

TEST PLAN DOCUMENT

Swag Labs — SauceDemo E-Commerce Platform

QA Assignment | June 2025 | Browser: Brave | Device: Windows Laptop

1. Scope

This test plan covers manual functional and exploratory testing of the SauceDemo e-commerce web application. The application simulates a real online store with intentional bugs embedded across different user accounts.

Features Under Test

- User Authentication — login, logout, session management, locked accounts, error messages
- Product Inventory — listing, sorting (4 options), product images, product detail pages
- Shopping Cart — add/remove items, cart badge, cart persistence, billing totals
- Checkout Workflow — form validation, order summary, tax calculation, order completion
- Multi-user Bug Verification — all 6 user types tested across every flow
- UI / Layout — button positioning, icon placement, cursor affordances, error layout
- Performance — login speed and loading feedback

Out of Scope

- Backend API or database testing
- Mobile / responsive design
- Cross-browser testing (Brave / Chromium only)
- Payment gateway (no real payments processed)

2. Types of Testing

Testing Type	Description
Functional Testing	Verify each feature works as expected — login, sorting, cart, checkout
Negative Testing	Empty fields, wrong credentials, locked accounts, invalid flows
UI / Visual Testing	Verify layout, images, button placement, prices and icons are correct
Edge Case Testing	Direct URL access without login, sorting with broken users, bypassing form validation
Cross-user Testing	Run identical flows across all 6 user types to isolate user-specific bugs
Exploratory Testing	Unscripted manual exploration to find non-obvious bugs beyond scripted test cases
Performance Testing	Measure login and page load times; verify presence of loading feedback

3. Test Environment

Parameter	Value
Application URL	https://www.saucedemo.com
Browser	Brave (Chromium-based, latest version)
Device	Windows Laptop / PC
Operating System	Windows 10 / 11
Test Date	June 2025
Testing Type	Manual exploratory + scripted functional

4. Test Data

All accounts use the password: secret_sauce

Username	Password	Expected Behaviour
standard_user	secret_sauce	Normal functionality — baseline for all tests
locked_out_user	secret_sauce	Login blocked with locked-out error message
problem_user	secret_sauce	Multiple bugs: wrong cart total, switched URLs, broken sort, dog images, broken Remove & Add to Cart, broken checkout
performance_glitch_user	secret_sauce	5+ second login delay with no loading indicator
error_user	secret_sauce	Sort JS error, broken Add to Cart on detail pages, broken Remove, frozen Last Name field, broken Finish button
visual_user	secret_sauce	Wrong/changing prices, dog image in first slot, misplaced buttons and cart icon, float error in checkout

5. Test Cases

20 test cases covering all modules and all 6 user types.

TC-01 — Valid login — standard_user			
Module	Authentication	Priority	High
Steps	1. Open https://www.saucedemo.com 2. Enter: standard_user / secret_sauce 3. Click Login		
Expected	Redirected to /inventory.html — 6 products visible		
Actual / Result	Pass — redirects correctly	Status	Pass

TC-02 — Login with empty credentials			
Module	Authentication	Priority	High
Steps	1. Leave both fields empty 2. Click Login		
Expected	Error: 'Username is required'		
Actual / Result	Pass — error shown	Status	Pass

TC-03 — Login — locked_out_user			
Module	Authentication	Priority	High
Steps	1. Enter: locked_out_user / secret_sauce 2. Click Login		
Expected	Error: 'Sorry, this user has been locked out'		
Actual / Result	Pass — correct message shown	Status	Pass

TC-04 — Logout clears session and blocks direct URL			
Module	Authentication	Priority	High
Steps	1. Login as standard_user 2. Menu → Logout 3. Navigate directly to /inventory.html		
Expected	Logout returns to login; direct URL blocked		
Actual / Result	Pass — session cleared correctly	Status	Pass

TC-05 — Product listing shows 6 items with correct details			
Module	Product Inventory	Priority	High
Steps	1. Login as standard_user 2. Observe inventory page		
Expected	6 products with name, image, description, price, Add to Cart		
Actual / Result	Pass — all 6 shown correctly	Status	Pass

TC-06 — All 4 sort options work correctly			
Module	Product Inventory	Priority	Medium
Steps	1. Login as standard_user 2. Try each sort: A-Z, Z-A, Price low-high, Price high-low 3. Verify product order after each		
Expected	Products reorder correctly for all 4 options		
Actual / Result	Pass — all sorts work for standard_user	Status	Pass

TC-07 — Add all 6 items — cart badge updates correctly			
Module	Shopping Cart	Priority	High
Steps	1. Login as standard_user 2. Add each product one by one 3. Check badge after each addition		
Expected	Badge increments from 1 to 6		
Actual / Result	Pass — badge updates correctly	Status	Pass

TC-08 — Remove item from cart			
Module	Shopping Cart	Priority	High
Steps	1. Add item to cart 2. Open cart 3. Click Remove		
Expected	Item removed, badge decrements		
Actual / Result	Pass — removal works for standard_user	Status	Pass

TC-09 — Complete checkout with valid details			
Module	Checkout	Priority	High
Steps	1. Add item → cart → Checkout 2. Fill First Name, Last Name, Postal Code 3. Continue → Finish		
Expected	Order confirmation: 'Thank you for your order!'		
Actual / Result	Pass — checkout completes	Status	Pass

TC-10 — Checkout form validation — empty fields			
Module	Checkout	Priority	High
Steps	1. Add item → cart → Checkout 2. Leave all fields empty 3. Click Continue		
Expected	Validation error: 'First Name is required'		
Actual / Result	Pass — error shown	Status	Pass

TC-11 — Order summary shows correct total, tax and grand total			
Module	Checkout	Priority	Medium
Steps	1. Add known items → Checkout → reach order summary 2. Manually verify: item total + 8% tax = grand total		
Expected	All values mathematically correct and consistently formatted		
Actual / Result	Pass for standard_user — values correct	Status	Pass

TC-12 — problem_user — cart total calculation is wrong			
Module	Bug Verification	Priority	High
Steps	1. Login as problem_user 2. Add Backpack (\$29.99) + Bike Light (\$7.99) 3. Open cart — check Item total		
Expected	\$37.98		
Actual / Result	\$75.96 — FAIL (BUG-01)	Status	Fail

TC-13 — problem_user — clicking product opens wrong detail page			
Module	Bug Verification	Priority	High
Steps	1. Login as problem_user 2. Click any product on inventory page		
Expected	Detail page matches clicked product		
Actual / Result	Different product's page opens — FAIL (BUG-02)	Status	Fail

TC-14 — problem_user — sort, images, Remove, Add to Cart all broken			
Module	Bug Verification	Priority	High
Steps	1. Login as problem_user 2. Try sorting, check images, add/remove cart items		
Expected	All functions work as per standard_user		
Actual / Result	Sort does nothing, dog images, Remove fails, 3 products can't be added — FAIL (BUG-03/04/05/06)	Status	Fail

TC-15 — error_user — sort error, Finish button broken, Remove broken			
Module	Bug Verification	Priority	High
Steps	1. Login as error_user 2. Try sorting, complete checkout, remove cart items		
Expected	All functions work correctly		
Actual / Result	Sort shows JS error, Finish does nothing, Remove fails — FAIL (BUG-10/15/12)	Status	Fail

TC-16 — visual_user — prices wrong on cards, change during sort, float error in checkout			
Module	Bug Verification	Priority	Critical
Steps	1. Login as visual_user 2. Check prices on cards, sort and re-check prices, proceed to checkout and check total		
Expected	Consistent correct prices everywhere		
Actual / Result	Wrong prices on cards, prices change randomly during sort, float error on summary — FAIL (BUG-16/17/23)	Status	Fail

TC-17 — visual_user — UI layout bugs (button placement, cart position)			
Module	Bug Verification	Priority	Medium
Steps	1. Login as visual_user 2. Check position of Add to Cart button on T-Shirt card, Checkout button on cart page, cart icon in header		
Expected	All elements in standard positions		
Actual / Result	Button misplaced, Checkout at top-right, cart icon displaced — FAIL (BUG-20/21/22)	Status	Fail

TC-18 — performance_glitch_user — login delay measured			
Module	Bug Verification	Priority	Medium
Steps	1. Login as performance_glitch_user 2. Time from clicking Login to inventory page loading		
Expected	Login within 2s with loading indicator		
Actual / Result	5+ seconds, no loading indicator — FAIL (BUG-24)	Status	Fail

TC-19 — All users — minor UI and UX issues			
Module	Bug Verification	Priority	Low
Steps	1. On login page attempt to fail login — observe error position 2. Hover over cart icon — observe cursor 3. Click sort dropdown arrow — observe behaviour		
Expected	Clean error layout, pointer cursor on cart, dropdown opens on arrow click		
Actual / Result	Error overlaps form, no cart pointer, arrow click non-functional — FAIL (BUG-26/27/28)	Status	Fail

TC-20 — All user types — Add to Cart on product detail pages			
Module	Product Detail	Priority	High
Steps	1. Login as each user type 2. Navigate to individual product detail pages 3. Click Add to Cart		
Expected	Cart updates for all users on detail pages		
Actual / Result	problem_user: fails for 3 products. error_user: fails for all detail pages — FAIL (BUG-07/11)	Status	Fail

6. Risk Assessment

Risk Area	Likelihood	Impact	Mitigation
Wrong billing totals	High	Critical	Manually verify cart totals match item sum for each user
Checkout cannot be completed	High	Critical	Run full checkout flow for all user types
Wrong/changing product prices	High	Critical	Compare prices across card, detail page and cart
Add to Cart / Remove failures	High	High	Test all 6 products for each user type on all pages
Product URLs crossed/switched	High	High	Verify each product opens its own correct detail page
Sorting broken or triggering errors	High	High	Test all 4 sort options for each user type
UI layout elements misplaced	Medium	Medium	Visually inspect all pages for each user type
Performance — no loading feedback	Medium	Medium	Measure login time; check for spinner on slow users

Minor cursor / error layout bugs	Low	Low	Check hover states and error rendering on login page
----------------------------------	-----	-----	--
